

Foundational Instruction for English Language Learners

Mango helps newcomers strengthen their social language skills.

Newcomers learn and gain confidence quickly.

5 additional family profiles included for family engagement.

Improve pronunciation and increase confidence with our voice comparison tool.

METHODOLOGY

Our methodology, intuitive language construction, was crafted by linguists and language experts to increase proficiency in speaking, listening, reading and writing.

Affective Filter

Mango was designed to create a low-stakes environment so students can learn, experiment with their new language, and gain confidence in producing the language at their own pace.

Krashen's Affective Filter Hypothesis¹

Comprehensible Input

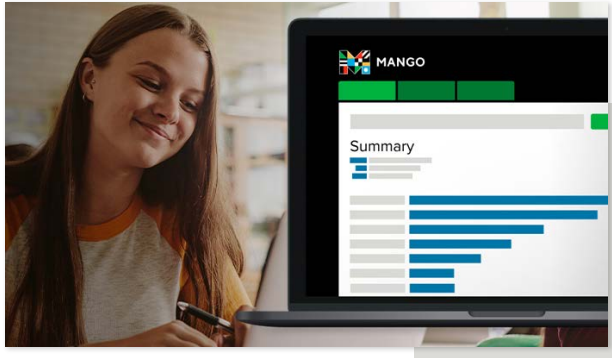

Mango's lesson material provides content that is comprehensible and slightly beyond the learner's current level of knowledge, which encourages steady progress and critical thinking in their language.

Krashen's $i + 1$ (Input Hypothesis)¹

Mango's most popular courses compare favorably to internationally recognized standards of proficiency, such as ACTFL. Each course provides five robust units that take learners to an ACTFL intermediate-high level of proficiency.*

1. To learn more about the second language acquisition principles behind Mango Languages, read our whitepaper: Mango Languages' Approach to Second Language Acquisition

With our technology teachers save time and students succeed.

Progress Tracking

Upload student lists and organize classes. Track progress and engagement. Review automatically graded assessments to monitor mastery.

Offline accessibility

The Mango app is free and allows users to pre-download lessons. Students can access their course even when wi-fi connectivity is scarce.

SUCCESS STORIES

New Caney ISD, TX

NCISD is finding success in engaging both their world language and English Learners across the school district. Implementing Mango has allowed them to provide an innovative resource for their language programs.

Clarke County School District, Athens GA

CCSD provides Mango to over 1,000 EL students across the district. Monthly Mango Meetings allow families to familiarize themselves with Mango while providing a platform for parents to feel empowered and get actively involved in their child's education.
